04 | Glossary

A Glossary of cover personalisation technologies and their abbreviations as well as default add-ons.

05 | Velvet & Suede Textiles

Textiles are perfect for anyone craving an aesthetically pleasing, durable linen product that is soft to the touch.

11 | Leatherettes

Leatherettes are made from synthetic materials making them vegan-friendly. A great choice for those craving the look and feel of real leather.

16 | Textiles

Rich and soft velvets in a selection of colours. Find your favourite velvet or suede finish here.

21 | Materials Available While Supplies Last

The materials in this section will be removed from our offer shortly and are available while supplies last. Please keep that in mind when selecting your cover material.

23 | Embossed Text Colours

Embossed Text foil colours are presented on C16 leatherette. Foil colours may differ slightly on the final product depending on the chosen leatherette base.

Glossary

A material permitting a given customisation option will be marked with (E, L, UV, G, S)

Laser Etch (L)

This technology exposes the base layer of the leatherette. Due to its invasive character, this technology is available on selected materials.

Note that the images in the swatch book are previews. However, the material's base colour may differ slightly which in turn may impact the colour of the laser etch.

Embossed Text (E)

This technology impresses a bookbinding font which can be left plain or embossed with your choice of coloured foil.

Gilding (G)

Gilding is a particularly elegant technique that involves applying a shiny, golden pattern to a material. The final appearance of the gilding depends on the surface it is applied to. The same pattern on leatherettes, textile materials, or velvets may vary slightly.

Available for Photo Albums in the following sizes: 8x8" / 20x20 cm, 10x10" / 25x25 cm, and 12x12" / 30x30 cm.

UV Print (UV)

This technology prints a layer on the chosen material. The colour of each UV print is carefully selected to best match each material's colour.

Stamp (S)

Created by pressing a set of characters onto a cover's surface. No new colors are created in the process, making it a subtle and elegant design option.

Ribbons

Ribbons are matched the interior colour of boxes at default. They cannot be mixed and matched.

IMPORTANT:

While browsing, be sure to check the availability of a personalisation option in the nShop, as a material batch may occasionally not permit for the option to be used.
